G54FOP/FPP 2012/13 Mathematical Foundations of Programming & Mini-Project Lecture 1-A Administrative Details and Introduction

Henrik Nilsson

University of Nottingham, UK

Finding People and Information

- Henrik Nilsson Room A08, Computer Science Building e-mail: nhn@cs.nott.ac.uk tel: 0115 846 6506
- Main module web page (both G54FOP & G54FPP):
 www.cs.nott.ac.uk/~nhn/G54FOP

Contacting Me

- I will be available immediately after each lecture for course-related matters.
- E-mail.
- Make an appointment if necessary.

 To provide a sound basis in a range of topics in the foundations of programming languages, including aspects of recent and current research. Specifically:

- To provide a sound basis in a range of topics in the foundations of programming languages, including aspects of recent and current research. Specifically:
 - Basic lambda calculus

- To provide a sound basis in a range of topics in the foundations of programming languages, including aspects of recent and current research. Specifically:
 - Basic lambda calculus
 - Operational semantics

- To provide a sound basis in a range of topics in the foundations of programming languages, including aspects of recent and current research. Specifically:
 - Basic lambda calculus
 - Operational semantics
 - Denotational semantics

- To provide a sound basis in a range of topics in the foundations of programming languages, including aspects of recent and current research. Specifically:
 - Basic lambda calculus
 - Operational semantics
 - Denotational semantics
 - Types and type systems

- To provide a sound basis in a range of topics in the foundations of programming languages, including aspects of recent and current research. Specifically:
 - Basic lambda calculus
 - Operational semantics
 - Denotational semantics
 - Types and type systems
 - Domain theory

G54FOP/FPP 2012/13Mathematical Foundations of Programming & Mini-ProjectLecture 1-A – p.5/13

Can only be taken together with G54FOP

- Can only be taken together with G54FOP
- Aim is to provide G54FOP students with the opportunity to deepen their understanding by an in-depth study of a specific topic related to G54FOP.

- Can only be taken together with G54FOP
- Aim is to provide G54FOP students with the opportunity to deepen their understanding by an in-depth study of a specific topic related to G54FOP.
- Non-exclusive list of suggested topics available via the module web page; additional topics or amended versions can be discussed.

G54FOP: Two lectures per week:
Thursdays, 11–12, B12, AMEN
Fridays, 11–12, B12, AMEN

G54FOP: Two lectures per week:
Thursdays, 11–12, B12, AMEN
Fridays, 11–12, B12, AMEN
G54FPP:

• **G54FOP:** Two lectures per week:

- Thursdays, 11–12, B12, AMEN
- Fridays, 11–12, B12, AMEN
- G54FPP:

- Written report on a research article/topic.

- **G54FOP:** Two lectures per week:
 - Thursdays, 11–12, B12, AMEN
 - Fridays, 11–12, B12, AMEN
- G54FPP:
 - Written report on a research article/topic.
 - Report deadline: Friday 3 May, 17:00 (CW submission)

- **G54FOP:** Two lectures per week:
 - Thursdays, 11–12, B12, AMEN
 - Fridays, 11–12, B12, AMEN
- G54FPP:
 - Written report on a research article/topic.
 - Report deadline: Friday 3 May, 17:00 (CW submission)
 - Presentation (20 + 5 minutes).

- **G54FOP:** Two lectures per week:
 - Thursdays, 11–12, B12, AMEN
 - Fridays, 11–12, B12, AMEN

• G54FPP:

- Written report on a research article/topic.
- Report deadline: Friday 3 May, 17:00 (CW submission)
- Presentation (20 + 5 minutes).
- Presentations towards end of spring semester (2 per lecture); spare G54FOP slots or specially scheduled.

• Assessment:

- G54FOP:
 - Unseen 2-hour written examination: 100 %
- G54FPP:
 - Written 10-page (3000–4000 words) report: 60 %
 - Presentation: 30 %
 - Participation in class discussions during presentations: 10%

Resit assessment:

- **G54FOP:** Unseen 2-hour written examination (like first sit)
- **G54FPP:** Extended, 20-page (7000–8000 words) report.

• Your own notes from the lectures!

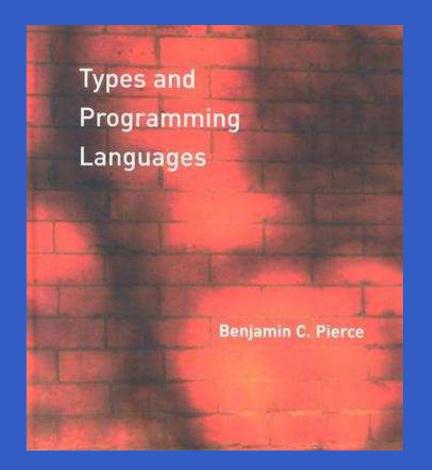

Your own notes from the lectures!

 The lectures will draw from:
 Benjamin C. Pierce. *Types and Programming Languages*, MIT Press, 2002.

A good reference for large parts of the module.

- Your own notes from the lectures!
- The lectures will draw from:
 Benjamin C. Pierce. *Types and Programming Languages*, MIT Press, 2002.
 - A good reference for large parts of the module.
- Other texts on lambda calculus, semantics, etc. I'll make some suggestions as we go along.

Literature (2)

 Mathematical preliminaries: formal languages, grammars, induction, inference rules, ...

- Mathematical preliminaries: formal languages, grammars, induction, inference rules, ...
- Semantics:
 - Operational
 - Denotational

- Mathematical preliminaries: formal languages, grammars, induction, inference rules, ...
- Semantics:
 - Operational
 - Denotational
- Lambda calculus

- Mathematical preliminaries: formal languages, grammars, induction, inference rules, ...
- Semantics:
 - Operational
 - Denotational
- Lambda calculus
- Type theory
 - Simply-typed lambda calculus
 - Recursive types?
 - Polymorphism (System F)

With G54FOP as a basis, G54FPP allows you to for example study topics like the following:

- Program analysis
 - Type reconstruction
 - Type and effects systems
 - Abstract interpretation
 - Data-flow analysis

With G54FOP as a basis, G54FPP allows you to for example study topics like the following:

- Program analysis
 - Type reconstruction
 - Type and effects systems
 - Abstract interpretation
 - Data-flow analysis
- Program logics and correctness
 - Hoare logic

Calculation of programs from specifications
