Notes on the mark scheme

Please note that you are marking the presentation, not the work itself – although the quality of the work might have some impact upon the “Content” criteria.

1. Content – do they have anything worthwhile to say? Do they know their subject area.
2. Is the material sensibly organised? Are their objectives outlined? Are technical terms defined before they are used, etc?
3. How clear and comprehensibly have they described their work and its theoretical basis
4. Have they made the work sound interesting?
