Careers with Cementation Foundations SKANSA

3rd Year Placement for Computer Science Undergraduate

Cementation Foundations Skanska is the UKs leading specialist piling and ground engineering company. The Company operates world-wide, with a background of 80 years experience in multi-disciplined contracts. Cementation Foundations Skanska’s success has been achieved through innovative design skills, offering clients cost-effective, alternative solutions and a reputation for quality and performance. The Company is a member of the Skanska Group, one of the world’s leading construction groups, with operations in Europe, the US and Latin America.

We are offering an excellent opportunity to a 3rd Year Student looking for experience and to develop their software skills. Working within our IT team your role will be to help develop and write bespoke in-house software for use on our construction sites. While primarily based in our Doncaster Office, you will be expected to travel to our sites, around the UK, to provide IT support, where you will work closely with our Engineers and plant operatives. You should also have excellent communication and team working skills these will be essential to customise the software to their needs and make IT that works for them. Ideally you will have some knowledge of Visual Basic v5 or 6 and be familiar with SQL Server. In return we offer a competitive salary and the opportunity to build your skills and knowledge, as you are exposed to a wide range of experiences.

Please email your CV to justine.broadley@skanska.co.uk by the 28th May
