Volantis Systems Ltd

Volantis’ award-winning technology platform provides multi-channel deployment solutions for mobile network operators, content providers, service providers and enterprises, that can be deployed to over 1300 devices including PCs, mobile phones, PDAs, interactive TV, VoiceXML, games consoles and other digital channels.

Intelligent Content Adaptation™ is at the heart of the Volantis technology platform, and solves the complexity of adapting digital information for individual mobile devices and digital channels - regardless of source, regardless of device, regardless of infrastructure.

Volantis also contributes significantly to the development of technology standards, and currently chairs the World Wide Web Consortium Device Independence Working Group (W3C DIWG).

Volantis partners with such organisations as Accenture, BEA, CSC, IBM, Intel & Vignette. Our customers include mobile service providers, media publishers, travel leisure and entertainment providers and retailers. Volantis has live deployments in over 12 countries within Europe, North and South America, Australasia and Asia. They include such companies as 3, AT&T Wireless, eBay, emap, Reuters, lastminute.com and Telenor.

JOB PURPOSE
These roles will be responsible for the construction and maintenance of all demo’s used by the Services & Sales teams. Demo’s are based on the Volantis products and should showcase the latest development attributes. There is also the opportunity to contribute to the user experience and testing of websites on mobile devices. Other opportunities will also be available throughout the Placement year.

PRINCIPAL ACCOUNTABILITIES

General
• Contribute to development of all external customer and partner demo’s
• Contribute to the testing of customer sites on various mobile devices
• Assist Support and Development teams when required.
• Adopt, maintain and encourage Volantis’ values and culture

KEY WORKING RELATIONSHIPS

Key working relationships will be across the organisation, working closely with the Development team, Services Team and Sales Team to ensure Demo’s are developed and tailored to individual customer or partner requirements.

FREEDOM TO ACT/SUPERVISION

Individuals will be set a schedule of work by their team leader. Typically this will be a set of scheduled tasks. Supervision will be maintained in the form of weekly reviews with the team leader to ensure work progresses and problems are identified in a timely fashion. Regular one on one meetings will be conducted with the Director of Engineering to ensure any general work issues are handled appropriately.

PERSON SPECIFICATION

General
• Industrial Placement vacancy for upto 1 year
• Good knowledge of Java/J2EE technologies
• Knowledge/use of Linux
• Experience of Web browsers, markup languages and W3C protocols
• Ability to work within a structured team environment or on own

The roles will be based at the Volantis HQ in Guildford, UK

TO APPLY

E-mail a CV and covering letter as to why you believe you would be suitable for the role to hr@volantis.com by 28 February 2005 at the latest.
