G53FSP – Formal Specification

2005-2006 Module Feedback

There were 4 people registered, with no one failed, on the module. The assessment was 100% on three pieces of coursework. The mean grade was 57.2 (with standard deviation 13.92). The highest score was 75 and lowest 42.

**Coursework 1 (15%): mean 50, SD 4.5**

Half of the cohort has done well on this coursework. The other half seemed not confident in using Z notations.

**Coursework 2 (35%): mean: 70, SD 7.1**

This coursework was done particularly well. The students got to know more on Z specifications, and were more confident on writing Z schema using latex.

**Coursework 3 (50%): mean 50, SD 7.0**

This coursework was not done as well as coursework II. The difficulty level was set higher than the above two coursework. The average was 50 out of 100. This indicates that the difficulty level should remain the same next year.

Below is the overview of the three coursework.
